PROCEDURES

Equipment doctrine for the AED 3 defibrillator

Recommended practice, [Automated external defibrillator – Zoll AED 3](#) (Version 01) has been published on the [Equipment recommended practices](#) toolkit.

SIMS worksheet, [Defibrillator – Zoll AED 3](#) (Version 01.1) has been published on the [SIMS equipment worksheets](#) toolkit. The SIMS worksheet will be distributed with the AED 3.

This doctrine guides operators in the correct operation and maintenance of the AED 3 defibrillator being phased in with FRNSW. Enhancements with the new defibrillator include:

- Paediatric capability at the press of a button with the supplied electrode pads.
- Increased capacity to save event data.

The lithium battery used in the AED 3 is a Class 9 dangerous good when transported. Use [Class 9a](#) labelling, a Dangerous Goods declaration and packaging meeting Australian Dangerous Goods Code requirements when transporting:

- the defibrillator with the battery installed
- the defibrillator with the battery otherwise included in the package
- the battery on its own.

See the [recommended practice](#) for more information on transporting AED 3 batteries.
