## POLICIES

### Using aircraft

The policy - Using aircraft (version 02) has been published on the [Aviation toolkit](#) on the intranet.

#### Key points

The revised policy includes:

- a. working with water bombing aircraft.
- b. the IC being notified if FRNSW staff are boarding an aircraft during operations. FRNSW staff can only board after receiving approval from the IC and a record of this approval must be made.
- c. updated communication channels and callsigns.
- d. emphasis on the authorisations and delegations to request an aircraft.

#### Note

Policy is to be reinforced to FRNSW strike teams where aerial operations are active.

#### Who needs to read the plan?

This policy needs to be read by all staff involved in operations using aircraft.

#### Rescindment

The policy Using aircraft version 2 rescinds:

- Using aircraft policy version 1
- Safety Bulletin 2002/9 Aerial attack firefighting

## PROCEDURES

### Site handover form

The *Site handover form* (Version 05) has been updated. It is available in a pad of 50 forms.

#### Key points

The form has been updated to:

- reflect the new naming and branding conventions of Fire and Rescue NSW.
- remove some of the legal wording concerning site handover.
- include additional pro-forma hazards such as dust, solar and battery power, dangerous trees, gas cylinders, and precautions such as wearing disposable coveralls.
- increase the size to A4.

#### What needs to be done?

Each station will be sent out a new pad of *Site handover forms* for each operational appliance at the station (excluding Service Exchange Vehicles). Any additional pads will need to be ordered through ESCAT. Each station's cost centre will be charged for the printing and distribution of the new pads.

Once the new pads arrive, only use the new version of the form (Version 05) at incidents. Remove the old pad (Version 04 or earlier) from the appliance and retain as per the Records and Information Management toolkit under [Site handover forms](#).

#### Rescindments

This replaces *Site handover form* (Version 04).

## NOTICES

### Accelerant Detection Canine – Name change

Fire and Rescue NSW are leaders in the field of ignitable liquid detection and currently are the only fire service in Australia to utilise Accelerant Detection Canines.

With the view to reflect industry best practice, and to provide increased accuracy in naming convention the Accelerant Detection Canine capability will now be known as **Ignitable Liquid Detection Canine (ILDC)**.
